PROFILE SUMMARY

Angular Developer with 6+ years of experience building scalable fintech and enterprise applications using Angular 6–19. Strong expertise in API integration, Reactive Forms, standalone architecture, and performance optimization. Available for immediate joining and open to relocation (Europe visa sponsorship).

EDUCATION

D.T.S.S College of Science - Mumbai University	Nov 2015
Maharashtra Board 12th - Maharashtra Board	Mar 2012
Maharashtra Board 10th - Maharashtra Board	Mar 2010

WORK EXPERIENCE

Rigel Networks Pvt Ltd (SMFG India Pvt Ltd) - Angular Developer	Jan 2025 - Dec 2025
• Worked on fintech web applications using Angular 19, TypeScript, HTML, and SCSS • Built reusable components and implemented lazy loading for performance optimization • Created Reactive Forms with validations and integrated REST APIs using RxJS • Used Angular Material for UI development and improved user experience • Integrated AI-based features such as smart search, data suggestions, and API-driven automation • Collaborated with team in Agile environment and managed code using Git.	
Gmoney Pvt Ltd - Angular Developer	Oct 2023 - Sep 2024
• Worked on fintech web applications using Angular 16, TypeScript, HTML, and SCSS • Developed reusable components and implemented lazy loading for performance. Built Reactive Forms for financial data entry with validations • Integrated secure REST APIs for transactions and user data • Collaborated in Agile environment and managed code using Git	
Hurix Digital Pvt Ltd- Software Engineer	Feb 2020 - Apr 2023
• Worked on service-based client projects using Angular (6–12), HTML, SCSS, and JavaScript • Developed and maintained reusable UI components for multiple client applications • Contributed to education and banking domain projects with responsive UI development • Integrated REST APIs and handled dynamic data binding • Handled and coordinated a team of 7 members, ensuring timely delivery of tasks • Used Git and SVN for version control and code management • Collaborated with cross-functional teams in Agile environment	

- Worked on fintech product for investors using Angular 6 & 8, HTML, SCSS, and JavaScript
- Developed UI features for company analysis and investment insights
- Implemented dynamic financial charts using Chart.js for daily market data visualization
- Built reusable components and handled API integration for stock market data
- Used Jira for daily task tracking and Agile sprint updates
- Managed code using Git and followed version control best practices

Flexiloans Pvt Ltd - Software Engineer**Jan 2018 - Feb 2019**

- Worked on fintech business loan platform using Angular 6, TypeScript, HTML, and SCSS
- Developed Loan Management System (LMS) modules and loan application workflows
- Created loan application forms using Reactive Forms with custom validations
- Implemented dynamic form controls for business and customer data capture
- Integrated REST APIs for loan processing and customer data
- Used Jira for daily task tracking and Agile updates
- Managed source code using Git and followed version control best practices

Mastertech Pvt Ltd - Php Developer**Jun 2017 - Dec 2017**

- Developed client websites as per business requirements using HTML, CSS, JavaScript, and PHP
- Created dynamic forms and handled form validations using PHP
- Implemented responsive UI for multiple client projects
- Integrated backend logic for data submission and storage
- Worked closely with clients to understand and deliver requirements

Concentrix Daksh Pvt Ltd - PRACTITIONER**Nov 2015 - Mar 2017****PROFESSIONAL SKILL**

- | | |
|------------------------------------|-----------------------------------|
| • Angular (6–19), Angular Material | • React JS, Node.js, .NET |

AWARDS/ACTIVITIES

- 01/05/2021, Star of the month, Hurix Digital Pvt Ltd

PROJECTS

Property Portal- SMFG India Pvt Ltd

Feb 2025 - Mar 2025

- Developed a fintech-based property portal with user and admin authentication.
- Users can log in using mobile number with OTP, while admins log in using mobile number and password.
- Implemented features to add, edit, delete, and view property listings.
- Built the application using standalone architecture with lazy loading for performance optimization.
- Implemented Reactive Forms and Angular Material for form modules.
- Integrated REST APIs and handled asynchronous data using RxJS.
- Utilized GitHub Copilot AI to accelerate development and improve code quality.
- **Technologies Used:** Angular 19, HTML, SCSS, RxJS

Super App- SMFG India Pvt Ltd (React JS-Mobile Application)

Sep 2025 - Oct 2025

- Developed a fintech super app with document viewing and Service Request (SR) creation features.
- Built responsive mobile-friendly UI for seamless user experience.
- Integrated APIs for document management and payment workflows.
- **Technologies Used:** React JS, HTML, SCSS

Code Of Conduct - SMFG India Pvt Ltd

Jul 2025 - Sep 2025

- Developed a Code of Conduct web application with login authentication using Employee ID and OTP verification.
- Implemented a Create Agent form using Reactive Forms with validations.
- Added multilingual support for 8 languages.
- Implemented logout functionality and automatic session timeout after 15 minutes of inactivity.
- Integrated the application with backend systems through REST API integration.
- Used GitHub Copilot AI for faster development and code suggestions.
- **Technologies Used:** Angular 19, HTML, SCSS, RxJS

DAF & Email Verification Api Integration- SMFG India Pvt Ltd

Jun 2025 - Jul 2025

- Upgraded the existing application from Angular 9 to Angular 19.
- Implemented login functionality using mobile number and OTP authentication.
- Developed accept and reject workflow with downloadable approval and rejection letters.
- Created email verification flow with links sent to customers for acceptance or rejection.
- Integrated REST APIs and handled asynchronous data using RxJS.
- Leveraged GitHub Copilot AI to enhance productivity.
- **Technologies Used:** Angular 19, HTML, SCSS, RxJS

Parivahan Service Portal- SMFG India Pvt Ltd

Oct 2025 - Nov 2025

- Developed vehicle-related service portal with secure authentication.
- Created vehicle registration module using Reactive Forms.
- Built standalone Angular application for scalability.
- Integrated REST APIs and handled async operations using RxJS.
- Used GitHub Copilot AI for code generation and optimization.
- **Technologies Used:** Angular 20, HTML, SCSS, RxJS

Hospital Onboarding - Gmoney Pvt Ltd

Apr-2024

- Developed a hospital onboarding module using Angular 14, Reactive Forms, HTML, CSS, and Bootstrap.
- Implemented multi-step form with stepper including Hospital Details, Authorized Signatory, Bank Details, and Document Upload sections.
- Integrated PAN-based validation and fetched hospital data using PAN API.
- Applied form validations and controlled stepper progression based on successful completion of each step.
- Displayed a thank-you page after submission and mapped the submitted data to the branch section in the profile.
- **Technologies Used:** Angular 14, HTML, CSS, Bootstrap, Reactive Forms

PROJECTS

Register Hospital- Gmoney Pvt Ltd

Mar-2024

- Developed hospital registration module using Angular 14, Reactive Forms, HTML, CSS, and Bootstrap.
- Implemented mobile number and OTP-based authentication.
- Displayed validation errors for already onboarded hospitals and incorrect OTP entries.
- Added success messages for OTP sent and verification status.
- Implemented UI as per Figma design specifications.
- Integrated testimonial API for dynamic content display.
- **Technologies Used:** Angular 14, HTML, CSS, Bootstrap, Reactive Forms

Scheme Add - Gmoney Pvt Ltd

Jan 2024- Feb 2024

- Developed scheme management module using Angular 14, Reactive Forms, HTML, CSS, and Bootstrap.
- Implemented tab-based navigation for NC, LC, and AAM schemes.
- Displayed schemes with checkbox selection based on selected tab.
- Submitted selected schemes and displayed data in a table format.
- Implemented edit and view functionality based on record ID.
- **Technologies Used:** Angular 14, HTML, CSS, Bootstrap, Reactive Forms

Hospital Profile - Gmoney Pvt Ltd

Dec 2023 - Jan 2024

- Developed hospital profile module using Angular 14, Reactive Forms, HTML, CSS, and Bootstrap.
- Implemented Add, Edit, and View functionality for hospital profile details.
- Integrated around 20 APIs to fetch and display profile data dynamically.
- Displayed uploaded images and PDF documents using Ngx-PDF-Viewer.
- Implemented branch management with data displayed in table format, including edit and view options based on branch ID.
- Added OTP verification for branch creation and updates; OTP sent to registered HSP number and verified before submission.
- Implemented resend OTP and call-based OTP integration APIs.
- Applied form validations and required field checks using Reactive Forms.
- **Technologies Used:** Angular 14, HTML, CSS, Bootstrap, Reactive Forms, Ngx-PDF-Viewer

Contact US

Dec 2023

- Developed Contact Us module using Angular 14, Reactive Forms, HTML, CSS, and Bootstrap.
- Implemented form fields for Hospital Name, Contact Number, and Message.
- Captured lead information for hospital panel marketing purposes.
- Submitted data displayed in Admin Panel using NgRx-managed table.
- Applied form validations and required field checks.
- **Technologies Used:** Angular 14, HTML, CSS, Bootstrap, Reactive Forms, NgRx

Calling Functionality

Nov 2023

- Implemented calling functionality based on manager-specific contact numbers.
- Integrated Node.js API to trigger call actions dynamically.
- Displayed manager contact details and enabled direct call initiation.
- Handled API integration and response management for calling workflow.
- **Technologies Used:** Angular, Node.js API Integration

Branding

Nov 2023

- Developed branding request feature using Angular 14, Reactive Forms, HTML, CSS, and Bootstrap.
- Hospitals submit poster requests with name, contact number, hospital name, checkbox selection, and file upload. Submitted requests are displayed in the admin panel.
- Updated status is reflected back in the hospital panel table.
- **Technologies Used:** Angular 14, HTML, CSS, Bootstrap, Reactive Forms, NgRx

PROJECTS

VSL Software Engineer - Hurix Digital Pvt Ltd

Feb-2020 – Jul-2020

- Worked on a US-based client-side e-learning project using Angular 6, HTML, and CSS.
- Developed game-like learning modules with multiple tasks and assessments for children.
- Implemented interactive UI and result page functionality.
- Contributed to educational content delivery with engaging user experience.
- **Technologies Used:** Angular 6, HTML, CSS

Roche - SDD - Hurix Digital Pvt Ltd

May-2020 – Jul-2020

- Worked on learning platform with interactive frontend activities.
- Implemented carousel, flip-card, and video screen components.
- Created assignment templates and quiz-based assessment modules.
- Developed result screen to determine student pass/fail based on quiz performance.
- Implemented progress bar to track completion up to 100%.
- **Technologies Used:** HTML, CSS, JavaScript, jQuery

NIMS -Aditya Birla - Hurix Digital Pvt Ltd

May-2021 – Aug-2021

- Worked on a client-side project using HTML, CSS, and JavaScript.
- Developed 7 reusable templates to manage approximately 430 screens.
- Implemented dashboard functionality displaying 15 modules with direct navigation.
- Developed exam score and mock exam features.
- Implemented result screen displayed at the end of the course.
- **Technologies Used:** HTML, CSS, JavaScript

Campaign Page - Flexiloans Pvt Ltd

Feb-2019 – Mar-2019

- Developed campaign page for customer portal with responsive design.
- Implemented new UI including cards, login functionality, and hamburger menu.
- Simplified user experience for easy navigation.
- Built frontend using Angular 6, HTML, and CSS.
- **Technologies Used:** Angular 6, HTML, CSS

Customer Portal Development - Flexiloans Pvt Ltd

Jun-2018 – Dec-2018

- Developed a web-based customer portal used by customers and operations team to create leads.
- Implemented modules for Personal Details, Financial Details, Profile Details, Business Details, and Document upload.
- Enabled add, edit, and update functionality for lead management.
- Implemented approval and rejection workflow based on business logic.
- **Technologies Used:** Angular, HTML, CSS, JavaScript
